33. Description of the issuer's principal activities.

JSC MGTS is the principal telecommunications operator in Moscow. It renders to its subscribers the services of voice mail and documentary communications, inquiry and other services in accordance with its license terms.

JSC MGTS is a major European city telephone network in terms of connected subscribers. The telephone ratio in Moscow exceeds 50 telephones per 100 residents, or 105 telephones per 100 households, which is a much higher rate than the average rate in Russia.

According to the Moscow City Statistics Committee and alternative operators, in 2000, the number of basic telephones installed in Moscow was 4.6 million, or 15% of the total Russian wire communications market. JSC MGTS controls 85.7% of total telephones in Moscow.

Primary operations and the share thereof in the aggregate proceeds

	2001	2002 (Estimate)
<i>Proceeds from the sales of goods, products, works and services (minus VAT, excises and similar mandatory payments) (RUR'000)</i>	7,937,492	9,55,510
<i>Share of proceeds from the sales of communications services (the primary business), %</i>	83,79	84,13

Currently, JSC MGTS obtains most proceeds (approximately 80%) from commercial entities. The Company anticipates that the structure of proceeds changes after the tariff rates are made equal for all categories of subscribers and time-based connections record system is introduced. 92% of all proceeds of JSC MGTS come from voice communications services. By 2003, the Company plans to increase its proceeds from documentary communications services to 40% of total proceeds. Such services are alternative and therefore not subject to tariff rates regulations.

JSC MGTS is a natural monopoly pursuant to Russian law controlled by the Government which approves the tariff rates for basic local communications services and cooperation with other operators.

Order No. 1070 of the Anti-Monopoly Ministry of Russia "On Approval of a Resolution of the Management Board of the Anti-Monopoly Ministry of Russia", dated October 12, 2001, introduces the following tariff rates for the services of local telephone communications provided by JSC MGTS:

	Corporate consumers non-governmental	governmental	Residents*
<i>November 1, 2001 through December 12, 2001:</i>			
<i>Provision of access to the telephone network, RUR</i>	9,000	9,000	6,000**
<i>Subscriber's monthly fee for the use of individual subscriber's unit, RUR</i>	165	85	70

As of January 2002:

Provision of access to the

<i>telephone network, RUR</i>	<i>9,000</i>	<i>9,000</i>	<i>6,000**</i>
<i>Subscriber's monthly fee for the use of individual subscriber's unit, RUR</i>	<i>165</i>	<i>100</i>	<i>80</i>

* *certain categories of residents enjoy privileges*

** *prices differ depending on the duration of the waiting period:*

- *RUR 3,000 for those who filed an application to enter into a telecommunications services agreement in the period from January 1, 1997 through December 31, 1999; and*

- *RUR 1,000 for those who filed an application to enter into a telecommunications services agreement before December 31, 1996 (inclusively).*

The Moscow telecommunications market has been liberalized. Other operators also provide traditional voice communications services. Alternative operators are not governed by anti-monopoly authorities, they are not bound by obligations to ensure that their services are publicly available, and compete with JSC MGTS in certain market sectors.

The advantages of JSC MGTS include comparatively low tariff rates and access to subscribers throughout the city. The Company owns a telecommunications infrastructure including technological buildings and subsurface constructions and provides contractual access to the public communications network to other operators. To ensure its prospective competitive strength, JSC MGTS reconstructs its network, introduces digital technologies and thus is able to provide a variety of highly profitable services and to improve the quality of services in combination with lower production and development costs.

34. Investment declaration. Description of the issuer's activities.

Shall be provided by investment funds only.

35. The issuer's prospective activities.

JSC MGTS constantly cooperates with major foreign manufacturers of communications equipment and operators. The successful implementation of joint projects fits logically into the concept of development and reconstruction of JSC MGTS developed by the Company's specialists which is built on a qualitatively new level and includes the use of modern switch equipment, SDH digital transfer systems, fiber optic lines and new methods of construction of the transportation network on the basis of circular structures. The first capacity of this project will be a public data transfer network on the basis of new SDH technologies, ATM switching, equipment for asymmetric digital subscriber access which will enable the

Company to provide a variety of communications services to its clients. After the project has been completed, the Company will be able to provide to its clients, in addition to high-quality services of local, domestic long-distance and international communications, certain new services including voice mail, high-speed e-mail and video conferences.
